

In December 2021

*The US authorized PEMEX**

*the acquisition of the
Deer Park Refinery in Texas ***

Why Deer Park breaches the Paris Agreement?

1

Deer Park increases anthropogenic emissions that affect global limits provided in the PA. Particularly, it hinders the US path to net-zero.

2

Deer Park is a financial flow that rises GHG and avoids climate resilience.

3

Deer Park disregards the fact that it contributes to global emissions.

4

As a consequence of Deer Park, the US failed to cooperate with Mexico to achieve the PA's below 1.5°C or 2°C warming goal.

** Mexico's State-owned oil company*

*** The acquisition by PEMEX of the Deer Park refinery will be referred to as Deer Park.*
